

Get Compliant. Avoid Violations. Use PSMWriter®.

PSMWriter® is a web-based software solution designed to help satisfy OSHA's PSM, EPA's RMP, and California's CalARP regulations. Each PSMWriter® package contains a variety of elements that work together to help you stay in compliance with today's industry regulations.

Process Hazard Analysis

- Six sample PHA(s) for different chemicals
- More than 150 sample "What-If" questions

Hazard Assessment

- Document off-site consequences of an accidental chemical release

Standard Operating Procedures

- More than 100 sample SOP(s)
- Keep track of reviews and certifications easily

Hot Work Permit

- Issue and follow up on hot work permits from anywhere with internet access.
- Maintain all hot work permit documentation in one secure location

Incident Investigation

- Document incident investigations and near misses
- Create reports, gather witness testimonies, and track action items

Employee Participation

- Schedule, track, and document employee activities
- Develop professional reports showing employee participation

Training

- Schedule, track, and document training activities
- Develop professional training certificates

Trade Secrets

- Document sensitive items that give your facility or process a competitive advantage
- Create and store employee confidentiality agreements

Mechanical Integrity

- Schedule, track, and document maintenance and inspections of process equipment
- Attach SOP(s) to each inspection
- Customizable list of available tools and parts
- Track action items using the PSMWriter calendar to ensure that recommendations are addressed in a timely manner
- Over 30 sample inspections to help get your MI program going in the right direction
- Print inspection reports and equipment reports

Contractor Qualification

- Vet potential contractors using the customizable contractor qualification form
- Evaluate contractors in fulfilling their duties
- Schedule contractor reviews and evaluations using the PSMWriter calendar

Compliance Audits

- Select from predefined audit templates or create your own audits
- Divide questions by categories and subcategories
- Track action items using the PSMWriter calendar to ensure that recommendations are addressed in a timely manner

Process Safety Information

- Organize and store all information relating to the process safety
- Easy access to the information from anywhere with Internet

Pre-Start up Safety Review

- Ensure that process changes are correctly installed prior to commissioning
- Select from sample PSSR checklists or create your own

Management of Change

- Manage the impact that a change will have on your business
- Schedule start up dates
- Customizable checklists to help you analyze and document the effects of the change
